

LOO YU CHAI

SKILLS

- Programming Languages
 - HTML, CSS, PHP, JavaScript, SQL, Python, Java
- Data Analytics & Data Science
 - Altair AI Studio (RapidMiner), Microsoft Excel (Power Query, Pivot Tables)
 - Predictive Modeling, Data Preparation & Cleaning
 - Statistical Analysis (Correlation & Regression)
- Networking
 - Routing & Switching (Cisco Packet Tracer)

PROJECT

Classhopper: Tuition Management System

Student Module

JUNE 2026 - NOW

- Developed a web-based administrative system designed to streamline tuition operations by automating student tracking, scheduling, and reporting.
- The system include: Secure authentication, dynamic timetable and class detail viewing, digital homework/test submission with real-time result tracking, automated attendance records, and an interactive student forum.

ReLife Hub: Recycling & Upcycling Web Application

Student Module

DEC 2025 - JAN 2026

- Developed ReLife Hub, a campus-based sustainability web application designed to encourage students, staff, and lecturers to practise recycling and upcycling through eco-friendly activities and rewards.
- The system includes secure authentication, recycling log management, upcycling tutorial sharing, eco-points and badge tracking, campus event participation, leaderboard features, and community content interaction.

The All Living Things Retail Store

Junior Data Analysis

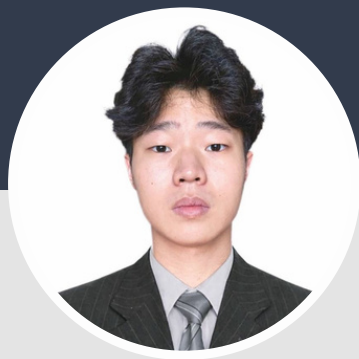

DEC 2025 - JAN 2026

- Cleaned a 1,0000+ row dataset by handling missing values, standardizing formats, and removing duplicate entries.
- Engineered custom business KPIs, including net revenue and discount impact costs, using advanced Excel formulas.
- Built an interactive dashboard with Pivot Tables, Slicers, and Timelines, conducting correlation and regression analysis for trend forecasting.

SEMINARS & WORKSHOP

- **ELL Tech Talk Series: LLM & ML, organized by DELL | 2025** (Explored foundational concepts of Large Language Models, machine learning applications, and emerging enterprise AI infrastructure).
- **Using Power BI for Data Analytics, conducted by Dr. Mohammed Al Obaydee | 2025** (Gained foundational insights into data visualization workflows, dashboard building, and business intelligence techniques using Power BI).
- **GX Bank Seminar on Digital Banking Trends, Insights, and Careers, presented by Chief of Staff Miss Hildah Hamzah | 2024** (Analyzed digital banking ecosystems, financial technology landscapes, and evolving fintech career paths).

PROFILE

- IT student with hands-on experience in web development, data analytics, and networking.
- Badminton coach and player with 3 years of coaching experience, demonstrating leadership, discipline, communication, and time management.
